

NEW MEXICO LOTTERY AUTHORITY

Title: Information Technology Administrator

The New Mexico Lottery Authority has an opening for an Information Technology Administrator. This position is the senior IT role at the Lottery which plans, develops, organizes, and manages the activities associated with IT functions. Directs and coordinates IT staff in all aspects of network administration of computerized management information and other forms of internal electronic and telephonic communication. Serves as a liaison between the NMLA and gaming vendor(s) for operation of and updates to the central gaming system. May be on call 24 hours a day, seven days a week unless otherwise authorized by the CEO.

Experience/Qualifications:

Bachelor's degree in computer science, business, or a related field is required. Must possess five to seven years of prior management experience and working experience in progressively more responsible positions wherein the skills and abilities to perform the position's essential functions have been adequately demonstrated. Lottery gaming system or lottery IT experience is strongly preferred. Professional certifications are a plus. Interested candidates must send their resume along with a cover letter to:

New Mexico Lottery Authority, Human Resources
P. O. 93130
Albuquerque, New Mexico 87199-3130
